Physical form and storage

Standard packaging includes the 25 kg bags, the 1000 kg octabin (octagonal container) or the 1250 kg big-bag. All containers are tightly sealed and should be opened only immediately prior to processing.

INNOPOL[®] CS 4-8830 should generally have a moisture content of less than 0.07% when being processed. In order to ensure reliable production pre-drying is suggested before processing of material at 80°C/2h.

INNOPOL[®] CS 4-8830 should be stored in dry conditions at temperatures below 60 °C and protected from UV-light. The quality of product may suffer due to storage under improper condition.

Recommended processing parameters

INNOPOL[®] CS 4-8830 can be extruded with standard extrusion lines.

The following temperatures should be used as guidelines:

Barrel temperatures	180 – 220°C
Polymer melt temperature	200 – 220°C
Die temperature	190 – 220°C
